An Evonik company.

My plant extracts, naturally

The following list contains raw material suggestions for men's cosmetics. Cosmetics are not just a woman's affair, but the trend is increasingly leading to strong and conscious men's cosmetics and aims at proper body care.

Botanica processes the corresponding raw materials into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some raw materials are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our raw materials. If you are looking for specific extracts for your formulation, we are looking forward to your contact.
