Botanica[®]
An Evonik company.

My plant extracts, naturally

The following list contains ProSpecieRara plants. ProSpecieRara is a Swiss non-profit foundation, founded in 1982 in St. Gallen. The purpose of the foundation is the "preservation and promotion of genetic diversity in fauna and flora". In particular, it aims to protect endangered livestock breeds and site-specific cultivated plants from extinction.

Further information can be found at: <https://www.prospecierara.ch>

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some plants are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our plants. If you are looking for specific extracts for your formulation, we are looking forward to your contact.
