

Topic list colors

Botanica GmbH • Industrie Nord 12 • 5643 Sins • Switzerland • www.botanica.ch • +41 41 757 00 00

The following list contains raw materials which are related to colors. Color perception is a subjective sensation which is determined not only by the nature of the incident light radiation but also by the nature of the eyes.

Botanica processes the corresponding raw materials into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts are only suitable for cosmetic and technical purposes.

In addition, Botanica does not carry out any animal experiments. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some raw materials are not available all year round. Please ask us about the availability. This list is not exhaustive. If you are looking for raw materials which are not on the list, we are looking forward to your contact.
